## Get the advanced calling features your business needs

<b>Online Feature Management</b>	Easily manage your phone settings through the online control panel.
<b>Call Rejection</b>	Restrict calls from anonymous or individual numbers.
<b>Call Notify</b>	Receive email notification of calls received based on your selection criteria.
<b>Extension Dialing</b>	Assign each user an extension so he or she can be easily reached from within the office.
<b>Forwarding Always/Selective</b>	Forward your calls to any number you want based on your schedule and the caller's identity.
<b>Remote Office</b>	Access and use your Spectrum Business Phone service from any telephone (in or out of the office).
<b>Call Logs</b>	Stay organized by tracking and responding to all missed, received, and dialed calls.
<b>Selective Call Acceptance</b>	Allow only certain incoming calls to reach you.
<b>Directed Call Pickup</b>	Pick up a call directed to another phone inside your business.
<b>Forwarding Not Reachable</b>	Forward your calls automatically in the event that the network connection is lost.
<b>Transfer</b>	Easily transfer calls to another extension or outside line.
<b>Priority Alert/Ringing</b>	Catch the important calls first by setting up a different ringtone or call waiting tone.
<b>Phone Lists</b>	Quickly find and call contacts in your online phone by name, number, or email address.
<b>Call Hold</b>	Put your caller on/off hold without dropping the call.
<b>Voicemail</b>	Enable callers to leave a message for you.
<b>Caller ID</b>	Know who's calling before you answer.
<b>3-Way Calling</b>	Connect with three parties at once.
<b>Voicemail-to-Email</b>	Send voicemails to your email.
<b>Call Blocking</b>	Restrict certain calls—collect, international, long distance, third party, directory/operator assistance.
<b>Call Return</b>	Call the last party who called you.
<b>Call Manager</b>	Use this web-based tool to allow click-to-dial, conference, answer, and transfer.
<b>Do Not Disturb</b>	Quickly set your line as unavailable, and send calls to voicemail, or give calls a busy signal.
<b>Speed Dial</b>	Quickly dial frequently called numbers.
<b>Fax-to-Email</b>	Send incoming faxes to your email.
<b>Forwarding No Answer/Busy</b>	Forward your calls to any number you want.
<b>Last Number Redial</b>	Call back the last number dialed.
<b>Alternate Number</b>	Add inbound-only numbers from your calling area to your line with a distinctive ring for each.
<b>Hunting/Rollover</b>	Route calls to available extensions to ensure that callers reach a live person before going to voicemail.
<b>Repeat Dial/Auto Callback</b>	Continuously repeat dial a number that is busy.
<b>Remote Number Forwarding</b>	Add inbound-only numbers that are from outside your calling area.
<b>Call Waiting</b>	Manage multiple callers at the same time.
<b>Simultaneous Ring/Sequential Ring</b>	Catch every call by having multiple phones—inside or outside the office—ring at once or one after the other.
<b>Auto Attendant</b>	Give your customers options to find the person they need.
